Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 4 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 4, line 9, the phrase "a rotation about said fulcrum" is confusing as it is unclear which particular structure applicant is referring to as a rotation. The claim need to be clear as to what structure is performing the rotation.

In claim 4, lines 9-10, the phrase "a rotation about said fulcrum is terminated by contact between said furthest wheel and said rail" is confusing as it is unclear which point of contact applicant is referring to since the furthest wheel being placed at a fixed distance from the closest wheel contacts the rail at all time; and

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 4 is rejected under 35 U.S.C. 102(b) as being anticipated by Bruno et al (US 5,967,265).

Bruno et al disclose a rail mounted transportation system comprising a rail (60), and

Art Unit: 3617

a support body (10), said support body comprising a load bearing section on the top surface, a closest spur gear (92) or alternatively a wheel as disclosed in col 5, lines 62-64, and a furthest wheel (40 or 142) placed at a fixed distance from the closest wheel; wherein said closest spugear (92) or wheel is adapted to operate as a fulcrum with respect to a weight of said support body as disclosed in col. 5, lines 50-54; and wherein a rotation about said fulcrum is terminated by contact between said furthest wheel and said rail; and wherein a magnitude of said rotation is relative to a gauge of said rail since any rotation about said fulcrum will have a magnitude based on the size of cross-section of the rail at any point along the rail.

Response to Arguments

5. Applicant's arguments filed 07/05/2005 have been fully considered but they are moot in view of the new grounds of rejection.

Applicant's argument regarding a Terminal Disclaimer is valid. The terminal disclaimer has been approved and negates the need for a double patenting rejection.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

Reussner is cited to show a related rail mounted transportation system comprising a wheel operating as a fulcrum to a support body.
